

## Environmental Policy

E-Cycle Ltd is committed to reducing the environmental impacts of all its processes relating to the refurbishment of electronic and electrical products and the manufacture' assembly and packaging of components and related products.

We will, as a minimum, comply with all applicable legislation and e-cycle sector and any other relevant requirements and where appropriate we will develop programmes and processes to achieve greater protection for the environment.

We are committed to conserving natural resources and to reducing the environmental burden of waste and energy consumption

We will strive to reduce, reuse and recycle waste and will ensure that any waste remaining is disposed of in a safe and environmental friendly way.

We will strive to prevent pollution at source, to use non-polluting technologies wherever possible and to minimise emissions to air, water and land.

We will monitor our environmental performance and are committed to using such information as part of a drive for Continual Environmental Improvements.

We will ensure that meaningful and measurable environmental targets and objectives are set periodically reviewed as part of our Management Review process.

We will strive to ensure that this Environmental Policy is:

- Implemented at all levels
- Communicated to all staff in a suitable format
- Made available to clients, suppliers, partners and the public as required
- Periodically reviewed to ensure its suitability
